Understanding CARDONE Caliper Part Number Codes

Application

All CARDONE remanufactured caliper part numbers

Problem

What parts and components are supplied with the caliper? What do the letters in the part number mean?

Solution

The answers are right there in the part number! The unit prefix and suffix are designed to help you know the type of caliper and what components are supplied. The definitions below describe the part number scheme:

Prefix Definitions:

- 18: Domestic Friction Choice caliper
 - Ex. 18-4712
- 18B: Domestic Friction Choice caliper with bracket
 - Ex. 18-B4712
- 19: Import Friction Choice caliper
 - Ex. 19-1556
- 19B: Import Friction Choice caliper with bracket
 - Ex. 19-B1556

Suffix Definitions:

- S: The piston material is metal – not phenolic
 - Ex. 18-4033S
- XB: Black powder coated caliper
 - Ex. 18-4299XB
- XR: Red powder coated caliper
 - Ex. 19-1218XR
- XY: Yellow powder coated caliper
 - Ex. 19-1378XY
- Non Bracketed: (18 or 19 prefix only)
 - A: Difference in hardware for non-bracketed caliper
 - Ex. 19-2914 & 19-2914A
 - A: Along with the above, it can also denote a difference in wheel size
 - Ex. 19-1336 (13" wheels) & 19-1336A (14" or 15" wheels)
 - B: Difference in hardware for non-bracketed caliper
 - Ex. 18-8046 & 18-8046B
- Bracketed: (18B or 19B prefix only)
 - A: Difference in bracket or hardware
 - Ex. 19-B2479 & 19-B2749A
 - B: Difference in bracket or hardware
 - Ex. 19-B1690 & 19-B1690B
 - C: Difference in bracket or hardware
 - Ex. 19B-985 & 19-B985C
 - D: Difference in bracket or hardware
 - Ex. 18-B4382 & 18-B4382D
